Création de page

```
class JobPage(Page):
    date = models.DateField("Published Date", default=timezone.now)
    location = models.CharField(max_length=100)
    short_description = models.CharField(max_length=200, help_text="Max 200 characters")
    thumbnail = models.ForeignKey(
        "wagtailimages.Image",
        null=True,
        blank=True,
        related_name="+",
        on_delete=models.SET_NULL,
        help_text="Choose a image for your cover")
    salary = models.IntegerField(verbose_name="A salary approximation")
    company = models.CharField(max_length=200)
```

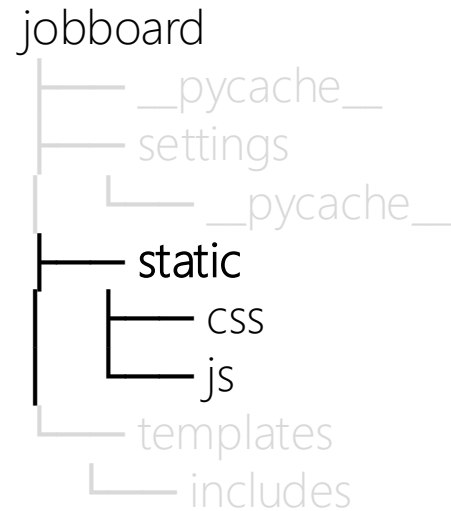

```
content_panels =
Page.content_panels + [
    FieldPanel("date"),
    FieldPanel("location"),
    FieldPanel("short_description"),
    FieldPanel("thumbnail"),
    FieldPanel("salary"),
    FieldPanel("company"),
]
```

```
{{ page.title }}
```

StreamField

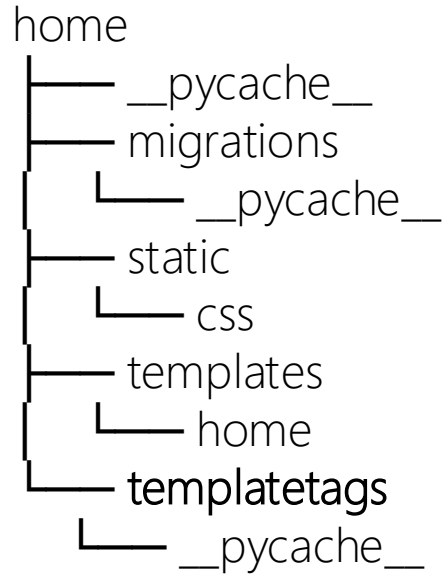

```
features = StreamField(  
    [  
        ('feature_icon', ImageChooserBlock(required=False)),  
        ('feature_title', blocks.CharBlock(required=True)),  
        ('feature_desc', blocks.CharBlock(required=True))  
    ]  
  
content = StreamField(  
    [  
        ('heading', blocks.CharBlock(template='blocks/heading.html')),  
        ('paragraph', blocks.RichTextBlock(template='blocks/paragraph.html')),  
        ('blockquote', blocks.BlockQuoteBlock(template='blocks/blockquote.html')),  
        ('list', blocks.ListBlock(blocks.CharBlock(), template='blocks/list.html')),  
        ('html', blocks.RawHTMLBlock(template='blocks/html.html')),  
        ('image', ImageChooserBlock())  
    ]  
)
```

Style

```
<link rel="stylesheet" type="text/css" href="{% static 'css/jobboard.css' %}">  
<link rel="stylesheet" type="text/css" href="{% static 'css/bootstrap.min.css' %}">
```

Menu

navigation_tags.py

```
register = template.Library()
@register.simple_tag(takes_context=True)
def get_site_root(context):
    return Site.find_for_request(context["request"]).root_page
```

template.html

```
{% load wagtailcore_tags navigation_tags %}
{% get_site_root as site_root %}
<ul>
  <li>
    <a href="{% pageurl site_root %}">Home</a>
  </li>

  {% for menuitem in site_root.get_children.live.in_menu %}
  <li>
    <a href="{% pageurl menuitem %}">{{ menuitem.title }}</a>
  </li>
{% endfor %}
```

Pied de page

```
@register_setting
class NavigationSettings(BaseGenericSetting):
    linkedin_url = models.URLField(verbose_name="Linkedin URL", blank=True)
    github_url = models.URLField(verbose_name="Git Hub URL", blank=True)
    mastodon_url = models.URLField(verbose_name="Mastodon URL", blank=True)

panels = [
    MultiFieldPanel(
        [
            FieldPanel("linkedin_url"),
            FieldPanel("github_url"),
            FieldPanel("mastodon_url")
        ],
        "Social settings"
    )
]

INSTALLED_APPS = [
    "home",
    "job",
    "search",
    ...
    "wagtail.contrib.settings"
]

"wagtail.contrib.settings.context_processors.settings",
```

Recherche

```
search_fields = Page.search_fields + [  
    index.SearchField('location'),  
    index.SearchField('company'),  
]
```

```
python manage.py update_index
```

```
<form action="{% url 'search' %}" method="get">  
<input type="search"  
    name="query"{% if search_query %}  
    value="{{ search_query }}" {% endif %}>  
<button type="submit">Search</button>  
</form>
```
